

TESTED

The National Marine Manufacturer's Association has tested, recognized, and validated the performance of isobutanol blends in marine engines. Mercury, Evinrude, Johnson, Sea Doo, Volvo Penta, Honda, Yamaha, and Indmar engines have all been extensively tested on isobutanol blends up to 16%. The manufacturers acknowledge the advantages over ethanol.

MERCURY BRP VOLVO PENTA YAMAHA HONDA

Isobutanol advantages

- Ethanol free
- No phase separation
- No water solubility issues
- 30% higher energy content than ethanol
- High octane
- Reduced emissions
- Made from renewable resources

Next Generation Marine Fuels

"It's great to have a biofuel that is so transparent to engine and boat performance..."

Jeff Wasil

Engineering Manager in Emissions Testing, Certification and Regulatory Development for BRP-Evinrude

Gevo is a leading and next-generation biofuels company.
